Health Professions Councils of Namibia and ECFMG Announce Partnership

ECFMG's EPIC Enhances Process for Evaluating the Medical Credentials of Namibia's International Medical Graduates

PHILADELPHIA, UNITED STATES—The Health Professions Councils of Namibia (HPCNA) and the Educational Commission for Foreign Medical Graduates (ECFMG[®]) are pleased to announce their collaboration to incorporate ECFMG's Electronic Portfolio of International Credentials (EPICSM) into the process for assessing the medical credentials of Namibia's international medical graduates (IMGs), those physicians who obtained their basic medical qualification outside of Namibia. The HPCNA is comprised of five councils, including the Medical and Dental Council, which work to protect the public through regulated education and practice. All physicians practicing medicine in Namibia must be registered with the HPCNA. Effective September 1, IMGs applying to the HPCNA for registration must have their medical credentials primary-source verified through EPIC.

Before September 1, 2016, the HPCNA obtained primary-source verification of IMG credentials through ECFMG's International Credentials Services (EICS). EPIC provides the same rigorous primary-source verification that ECFMG delivers through EICS, as well as additional benefits not available through EICS. These include a secure, web-based platform for authenticating the credentials of applicants, along with paperless processing and recordkeeping. For IMGs, EPIC offers a service that they can use throughout their careers to build a digital portfolio of verified credentials related to their medical education, training, and registration/licensure. Using EPIC, IMGs can request reports demonstrating the authenticity of their credentials for organizations worldwide, including regulatory authorities and potential employers, such as hospitals and academic institutions. EPIC also enables IMGs to submit their credentials for verification electronically, eliminating postal costs and potential transit delays, as well as reducing processing times.

About EPIC

EPIC offers primary-source verification of medical credentials to organizations and physicians worldwide. In verifying the authenticity of physician credentials related to medical education, training, and registration/licensure, EPIC employs the same world-class, primary-source verification process used by ECFMG to verify credentials for other ECFMG services, including ECFMG Certification, the standard for international physicians entering the U.S. health care system. For organizations that are responsible for evaluating physician qualifications, EPIC provides no-cost access to primary-source verification—verifying the authenticity of a credential directly with the issuing institution—for the purpose of evaluating their applicants’ credentials. For the world’s physicians, EPIC is an innovative way to build a digital career portfolio of the credentials related to their medical education, training, and registration/licensure—a portfolio that can grow with their careers. For more information, visit www.ecfmgepic.org.

About ECFMG

Established in 1956, ECFMG is a private, nonprofit organization based in Philadelphia, Pennsylvania, with more than 800 full- and part-time employees.

ECFMG is a world leader in promoting quality health care—serving physicians, members of the medical education and regulatory communities, health care consumers, and those researching issues in medical education and health workforce planning. ECFMG’s program of certification evaluates whether international medical graduates are ready to enter U.S. programs of graduate medical education, where they provide supervised patient care. ECFMG offers a variety of other programs for the world’s physicians and the entities worldwide that educate, train, register/license, and employ them.

ECFMG’s organizational members are the American Board of Medical Specialties, American Medical Association, Association of American Medical Colleges, Association for Hospital Medical Education, Federation of State Medical Boards, and the National Medical Association.

For more information, visit the ECFMG website at www.ecfmg.org.
